

## Oakville Crane Training School

Oakville Crane Training School - We provide industry relevant programs in our crane training school. The course will provide our trainees with learning results matching the existing industry demands. Our small class sizes combine theory and hand-on experience. Our industry-experienced, qualified instructors provide real world expertise to assist individuals training to obtain valuable knowledge and skills in their chosen field.

### Theory Programs

The feature elements included in the crane training school comprises information regarding power-line safety, regulations, inspection, and site dangers involved in crane operation. Trainees would gain knowledge of load charts, rigging and hardware applications. Direct feedback and quizzes throughout the course will help individuals training solidify their knowledge.

Theory course topics: Safety fundamentals for crane operators; introduction to crane certification process; crane operation knowledge; rigging knowledge; crane rigging charts; communications knowledge; load chart knowledge; crane pre-trip inspections & set-up, and crane service and maintenance.

### Practical Programs

The crane training school consists of practical training including hands-on learning. This component teaches trainees how to identify crane terminology and components. People training will have the chance to practice skills required for crane signaling, rigging and operating.

Practical course topics: Identify crane functions and components; Learn crane terminology; identify wire ropes and rigging; use remote control; pre-use inspection on crane; identify documents and regulations for rigging and wire rope; carry out rigging methods; use hand signals and radio; and perform right lifting and lowering of loads.
