

Oakville Order Picker License

Oakville Order Picker License - Order picking is otherwise known as order preparation operation. This is among the key processes in a warehouse and comprises people called order pickers, collecting and taking articles in a certain quantity previous to shipment so as to accomplish customer orders. Order picking is an easy warehousing method. The efficiency in which this job is accomplished could be directly linked to a supply chain's productivity. Hence, order picking is one of the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are particular kinds of order picking which include: wave picking method, pick to box method, piece picking or picker to part method, zone picking method and sorting systems method.

The pick to box method involves the order picker just filling the boxes with stuff which are from their specific station. The box then moves on to other stations to until the order is complete. In this process, there is no movement of the order picker workers. In the wave picking method, the order pickers move all-around to collect the necessary items for several orders. The picker to part method or piece picking is similar where the order pickers or picker move to collect the stuff required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, stuff are brought to the orderpicker by an automatic system such as an automatic storage system or a conveyor system. In the zone picking method, every order picker is assigned to one particular zone. They are responsible for just realizing order picking in this specified area.
