

Oakville Boom Lift Training

Oakville Boom Lift Training - Aerial platforms or also known as elevated work platforms are devices that enable workers to carry out duties and tasks at elevated heights that will not be otherwise reachable. There are various aerial lifts on the market to perform various applications under various site conditions. If operated carelessly, elevated work platforms could result in death or serious injury. The most common reasons for related accidents are electrocution, falls, crushed body parts and tip-overs. Lift operators should be trained fully in procedures to prevent accidents during the operation of lifts.

Aerial Lift Safety program is intended for individuals who should operate the devices more safely and effectively. The course provides thorough instruction about the most utilized lifting devices within the industry.. Kinds of lift covered comprise articulating, boom supported and scissor aerial lifts. The video presents the correct techniques operators must follow. Instruction focuses on protection against falls, pre-operational inspection, safe driving procedure and stability of the device.

The boom lift training course will help to address equipment reliability and employee safety, making use of materials that are fully compliant with your regional and local requirements and regulations. Training methods and course management will be taught. The trainer would also know the technical aspects of aerial lift safety.

Parts of the Boom Lift Training program include both classroom training and practical training. Both sessions should be successfully completed for the participant to be given a certificate of achievement.

The self-propelled boom-supported elevating work platforms are different from the self-propelled elevating work platforms in that they are able to position their work platforms completely beyond the base of the machine. The theoretical part of the training is almost identical for both types. The practical training part can be finished sooner if just one type of machine is utilized.

Elevating Work Platform Training Program Objectives:

For safely operating Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training would help operators make use of their machinery more efficiently and will decrease the possibilities of accidents in the workplace. Trainees would review of business policies and applicable regulations, talk about Due Diligence, review Criminal Negligence and consequences to employers, trainers, workers and supervisors. Participants would study machine features, operating procedures, stability, charging/fueling procedures and parking. Site-specific safety matters will be addressed.
